➤ Introduction

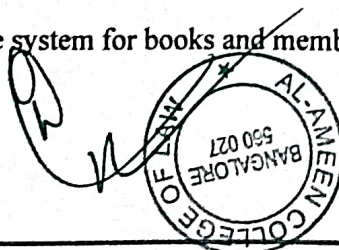

Libsoft

Library is an effective source of information of all kinds to be shared by people of all kinds. A good library hosts everything under the sun in the form of words to enrich the knowledge of the users. Providing information about everything under the sun, under one roof in one graphical location is next to impossible. Hence there must be a way to share information that is spread over, and that can be achieved only through the effective use of electronic media. Complete computerization of all the libraries and a dedicated, centralized server to host information available at different libraries will help in effective sharing of information. A library is completely computerized only if the user, irrespective of background or knowledge, is able to access information available in the library from anywhere just by typing few letters /words.

Libsoft is a package designed and developed for effective management of a library. This package has been designed to handle huge volumes at lightening speed thus saving manpower. Libsoft is Windows based software and it runs in any Windows environment and hence it has excellent Graphical User Interface.

Libsoft has the following features.

- Libsoft is an absolute user - friendly software that requires minimum training.
- Library is a simplified package, which requires minimum user interaction.
- Library features interactive data handling for storing backup etc.
- Library is an easy and effective maintenance system for books and members etc.

- Library contains the best circulation system wherein the user needs very few interactions with the system. The system finds the status of books or members automatically and allows the circulation process accordingly.
- Library contains enhanced but simplified search facility and can locate books and members quickly.
- Library contains enhanced documentation facility for preparing detailed reports the way the user prefers.
- Library generates financial report for any given period.
- ID Card for members / users with Barcode.
- Automatic Barcode generation for Access numbers of items (Books)
- Library eliminates card system to ensure complete automation.
- Library contains extensive Online help facility to guide the user.
