### REPORT ON MEDICAL CAMP AND HEALTH CHECK UP CAMPS CONDUCTED BY AL-AMEEN COLLEGE OF LAW

It's great to hear about the outreach and social commitment activities undertaken by Al-Ameen College of Law. Such initiatives are essential for the overall development of society and the well-being of its members. The combination of legal literacy programs and health awareness initiatives, in collaboration with organizations like Karnataka Cancer Society and Naari Foundation, showcases a holistic approach to community service.

The involvement of dedicated doctors and the organization of health check-up camps, along with the distribution of free medicines to underserved communities in slum areas and villages, is a significant contribution to public health. Access to healthcare and medicine is a fundamental right, and such efforts play a crucial role in ensuring that even those with limited resources can receive the necessary care.

It's also commendable that these programs were led by respected individuals like Dr. Waseem Khan, the Principal of Al-Ameen College of Law, and Mr. Syed Suhail, the NSS Program Officer, along with the assistance of Mr. Hobalaiah, the Assistant NSS Programme. Their guidance and leadership are essential for the success of such initiatives.

Involving enthusiastic volunteers and providing them with mentoring during these programs not only helps in the smooth execution of activities but also instills a sense of social responsibility in the volunteers. Knowing that they have made a positive impact on society is indeed a fulfilling experience.

**LEFT MAMMOGRAPHY**

**TECHNIQUE:** Cranio-caudal & medio-lateral views were obtained.

**FINDINGS:**

- Demonstrate BI-RADS-2 parenchymal pattern.
- There is symmetrical distribution of glandular components in Left breast. Subareolar ductal opacities are normal.
- No evidence of mass lesion or micro calcification.
- No axillary lymphadenopathy.
- Nipple and skin over the breast are within normal limits.

**IMPRESSION:**

- Normal mammographic appearances of left breast (BI RADS 1).

**RECOMMENDATIONS:** Clinical correlation.

**BILATERAL MAMMOGRAPHY**

**FINDINGS:**

Cranio-caudal and medio-lateral views were obtained.

- Both breasts demonstrate BI-RADS - A parenchymal pattern.
- There is symmetrical distribution of glandular components in the both breasts. Subareolar ductal opacities are within normal limits.
- No evidence of mass lesion or micro calcification.
- No axillary lymphadenopathy.
- Nipple and skin over the breasts are within normal limits.

**IMPRESSION:**

- Normal mammographic appearances of both breasts (BI-RADS - 1).

RECOMMENDATIONS: Correlate clinically and with sonomammogram.

**BILATERAL MAMMOGRAPHY**

**CLINICAL HISTORY:** Screening mammography.

**TECHNIQUE:** Cranio-caudal & medio-lateral views were obtained.

**FINDINGS:**

**RIGHT BREAST:**

- Demonstrate BI-RADS-III parenchymal pattern.
- There is symmetrical distribution of dense glandular components in right breast. Subareolar ductal opacities are normal.
- There are well-defined round opacities in right breast parenchyma with well-defined margins ranging in size from 7-9 mm, likely of benign etiology.
- No axillary lymphadenopathy.
- Nipple and skin over the breast are within normal limits.

**LEFT BREAST:**

- Demonstrate BI-RADS-III parenchymal pattern.
- There is symmetrical distribution of dense glandular components in Left breast. Subareolar ductal opacities are normal.
- There are well-defined round opacities in left breast parenchyma with well-defined margins ranging in size from 7-9 mm with calcific specks of calcification within the opacities, likely of benign etiology.
- No axillary lymphadenopathy.
- Nipple and skin over the breast are within normal limits.

**IMPRESSION:**

- Dense glandular components in both breasts (BI RADS 0).
- Well-defined round opacities in right breast parenchyma with well-defined margins ranging in size from 7-9 mm, few of the opacities in the left breast parenchyma showing calcific specks likely of benign etiology.
