## PRINCIPAL'S MESSAGE

The ultimate objective of legal education is to produce competent lawyers whose aim in any given society to defend fundamental rights of individuals as well as their welfare. Through the proper education only an orderly and civilized society can be built. Through education only humanity in the society can be protected. Education in the today's world can play a very important role to develop the nation. Education is more powerful tool than nuclear technology. The need of the hour is to develop our educational system and the modality of imparting education to make it more sensitive and vibrant with a deep sense of social commitment and concern. Legal education has its own role to play in the development of society and country. The institutions giving legal education must on priority to undertake the task of creating legal awareness in the society. The lawyers as social engineers have a great responsibility of interpreting law in its social context to serve the purpose for which it exists in the society.

Furthermore, legal education helps to produce a competent lawyer. It has been noted that 'A competent Lawyer' in accordance with general education policy is presumably "someone who has acquired appropriate skills, abilities and competence, both physical and intellectual, as required for her to play her role as a useful member of the community.

Al-Ameen will stand as the torch to this nation by imparting the legal education to young generation where they can live with dignity and honour with their heads held high.
